

## **NFS-Filtratecapsule™**

### **Description**

**NFS-Filtratecapsule™** is a unique blend of polyanionic and cationic polymers, designed to provide filtration control and a moderate supplementary viscosity.

### **Advantages**

- ◆ This unique product was developed with the environment in mind as it is produced from food grade products.
- ◆ Effective in saltwater, freshwater and brines.

### **Benefits**

- ◆ Non-toxic
- ◆ Temperature stable to 300°F

### **Physical Properties**

- |               |                           |
|---------------|---------------------------|
| ◆ Form        | Powder                    |
| ◆ Color       | Off White to Light Yellow |
| ◆ Density     | 40-55 lbs/cu.ft.          |
| ◆ Flash Point | 430°F (221°C)             |

### **Mixing Recommendations**

Simply add to the make-up water at the rate of 0.5-2.0 ppb.

### **Packaging**

- ◆ NFS-Filtratecapsule™ is available in a 50lb. bag.
