

NFS-Lubracapsule™

Description

NFS-Lubracapsule™ A proprietary blend of lubricants, designed to provide full time lubricity to all types of water base fluids. A high performing lubricant designed to work in high solid and high temperature environments. Because NFS-Lubracapsule™ was designed with the environment in mind, it can be used safely and effectively in both onshore and offshore wells.

Advantages

- ◆ Minimizes bit balling
- ◆ Reduces torque and drag
- ◆ Minimizes differential pressure sticking
- ◆ Decreases friction and wear
- ◆ Performs in high solids environment

Benefits

- ◆ Non-toxic
- ◆ No adverse effect on rheological properties
- ◆ Meets EPA discharge requirements
- ◆ Stable up to 500° F

Physical Properties

- ◆ Form: Liquid
- ◆ Specific Gravity: 0.9 g/cc
- ◆ Color: Light Brown to Yellow

Mixing Recommendations

For continuous lubricity add 1% by volume to the water base mud system. For sweep, add 3% – 5% by volume to the existing water base fluid.

Packaging

- ◆ NFS-Lubracapsule™ is available in a 55-gallon drum or 13 barrel tote tank
