

NFS-Viscapsule™

Description

NFS-Viscapsule™ is a viscosifying agent, designed to provide full time viscosity in the NFS Super System™. This unique product was developed from food grade ingredients and is therefore environmentally safe to use.

Advantages

- ◆ Provides full-time viscosity
- ◆ Easy addition to hopper
- ◆ User friendly in all types of make-up water, i.e. freshwater, saturated salt, potassium and calcium chloride

Benefits

- ◆ Non-toxic
- ◆ Stable up to 300°F

Physical Properties

- | | |
|-----------|------------------|
| ◆ Form | Powder |
| ◆ Color | White |
| ◆ Density | 30-50 lbs/cu.ft. |

Mixing Recommendations

Add directly through the mud hopper at the rate of 6-10 ppb.

Packaging

- ◆ NFS-Viscapsule™ is available in 50 lb. bags
